

## THE WORLD OVER

FUEL OIL TAX STARTS MAY 1

EDMONTON—New fuel oil tax passed at the last session of the legislature, under which the provincial government expects to raise \$200,000 additional revenue this year, is to be effective on May 1, according to official announcement in the Alberta Gazette.

The tax is broadened to cover all lower grades of fuel oil. The tax is seven cents per gallon, with a rebate of six cents when the fuel is used for farming or industrial purposes.

### FINDS NOTHER EGYPTIAN TOMB

CAIRO—Prof. Selim Bey Hassan announced the discovery of another ancient Egyptian tomb last week, believed to be the burial place of Knum Baef, a son of Cheops, the fourth dynasty.

A series of strange incidents prevented the archaeologist from forcing an entrance into the tomb. After a rope had been placed around the first limestone block sealing the entrance, Hassan's foreman was stabbed by a knife.

Prof. Hassan recently announced discovery of a tomb containing the mummy of a princess believed to be the daughter of Chlops, builder of the pyramid near Gizeh, about 3,700 B.C.

### OH OFFICIALS AT ATHABASCA

According to the "Echo" it is planned to drill for oil in the vicinity of Athabasca this spring. The following news appeared in the last issue of the "Echo":

Afred Hinds, former President of the Merlaid Oil Co. of Canada, who is head of the Calgary syndicate that holds the oil leases on 20,000 acres of land in this district, arrived here yesterday in company with Dr. J.O.G. Sanderson, geologist, to initiate the activities in the local field.

They plan to pick the location for the first of six wells to be drilled here this summer. Today they are out on inspection and should have some definite word for next week.

### BASIL MYLER DIES AT EAST COULEE MONDAY

J. B. MYLER, well-known East Coulee citizen, and a resident of Carson for a number of years, died very suddenly last night. Mr. Myler was in the home of friends on feeling ill, laid down for a few minutes and passed away almost immediately.

Deceased came to Canada from Liverpool, England, about 15 years ago, and later came to Carson, where he was employed at the Carson Hotel. About four years ago he moved to East Coulee, and for a time was employed in an hotel at that point.

The late Mr. Myler was a bachelor, and is survived by a sister in Ireland, and two brothers, one in the United States, and the other in North Wales.

### SALES TAX EXEMPTIONS ANNOUNCED BY HUGILL AT EDMONTON THURS.

#### GARRETT MOTORE TO SPONSOR HOCKEY PICTURES

It was announced this week by the local Chevrolet Dealers, Garrett Motors, that they would sponsor a free show in the Farmers' Exchange Hall, Carbon, on Friday night, April 24th, showing two reels of hockey, two reels of football, and two reels of Garrett Motors of Assembly pictures taken at the factory.

The exemptions cover a wide scope including most of the primary necessities of life, many of the prime needs of industry, most foods, agricultural products, and the secondary needs in conducting business, and all commodities sold for consumption or use outside the province.

The Sales Tax is levied under the act passed at the recent session of the legislature, and in the budget is estimated to yield \$2,000,000 annually.

This act, known as the "Ultimate Purchaser's Tax Act," was to be effective only upon proclamation. Acting Premier Hugill announced that it will be proclaimed within the next 10 days, to become effective May 1.

For the time being, there is no alternative act, to provide for a flat rate of tax of 10 per cent applied on the wholesale, or jobber of various commodities, is awaiting amendments to the B.N.A. Act to validate indirect taxation by provinces.

In the meantime, the Ultimate Purchasers Act makes every retailer in the province an agent of the government, charging him with duty of collecting the sales tax and delivering it to the government.

#### List of Exemptions

The list of exemptions specifies the acts of the following: gas, milk, coal, coke, water, newspaper, farm machinery and repairs, timber, binder twine, electricity, agricultural produce produced within the province when sold by the producer thereof, fuel-oil as designated by the fuel oil act, liquor as specified in the Liquor Control Act, tobacco, sugar and flour, and adds to these:

Advertising—in newspapers, periodicals, etc. Advertising literature (see "printed matter.") Amusement tickets Amusements.

Balloon sales, cigarette, tea, coffee and other substances, cooking and animal waters, medical waters. Banks Bulbs, bushes, plants, shrubs and all trees produced within the province when sold by the producer thereof.

Cold, church supplies, commodities sold for consumption or use outside the province, for exportation, by the producer thereof, Alfred.

Practices are to be held every Monday, Wednesday and Friday evening. Club fees were set at 25¢ a month and the expenses for out of town games are to be paid by the club.

Anyone wishing to try out for the team is asked to attend the practices.

Containers and all packing material

to be used for the delivery of goods, boxes, bottles, sacks, bags, barrels, cans, crates (when returnable), wrapping paper, string, cord, label and all marks of identification of a product, all printed matter giving directions for use information or explanations of use and methods of packing, labels, cartons and packages of crates, boxes, etc., glue for labels.

Debentures, debts, doctor's prescriptions for drugs and medicines, drugs bought on doctor's prescription.

Fares on tramways, automobiles, railroads, steamship, telephone systems by land water or air, feed for poultry or animals, fertilizer, firewood.

Chemicals for treating seed grain, chemicals for the destruction of weeds and pests, barb wire, artificial limbs, Foodstuffs

Footholds, cereals and their products, pines, peats, biscuits, cakes, all bread, etc., meat and its extracted products, meat juice, packed and canned meat, milk and its products, butter, cream, cheese, malted milk, condensed milk, evaporated milk, fish and fish products, camel hair, eggs, their products, canned vegetables, prepared salads, etc., fruits and their products, dried fruits, canned fruits, preserves fruits, fruit juices, nuts, peanut butter, cocoa butter, etc., salt products and their products, sugar products, soap, laundry starch, extracts, chocolate and ice cream, Syrup, maple butter, gelatine, extract, flavor, jelly powder, malt, sauces, soups, Grains, Hay, ice, insurance premiums.

Salaries, wages, etc.

### CARBON STAMPEDE DATE SET FOR JULY FIRST; MAY HAVE OTHER SPORTS TOO

A meeting of interested stampede supporters was held in the Municipal office last Wednesday night, and although the crowd was small, it was decided that a date should be set for the Carbon Stampede.

President, H. M. McNaughton. Vice-Pres. Chas. Guyan. Secretary, S. F. Torrance.

Members of the various events to be held at the stampede were made up with provisions to add to the program if necessary.

In setting the date the time of the stampedes in other parts of the district were taken into consideration, and it was decided that July 1st might be held an appropriate day.

The Carbon Stampede Association has joined up with the provincial association and all rules and regulations governing that body will be followed on the same day.

It is expected that the Carbon Stampede will be held on the day of the Provincial Stampede.

It has been suggested that the Carbon and surrounding school districts get together with a view to deciding on the annual day when they would hold the annual sports.

It is suggested that the best interest of the school sports and stampedes were held on the same day, so as to cause no confusion, and to give the spectators a full day of sport.

Men TRAPPED IN MINE FOR TEN DAYS; RESCUED

After being trapped in a Nova Scotia mine since April 12th, when the entrance was blocked by a capsized truck, three officials were taken from the workings on Wednesday afternoon, although only two of them were alive, the third having died some days before rescue was made possible.

Dr. G.L. McFarlane is leaving soon to take a surgeon's course at the large college in the East.

Mr. George Mathur is building a new residence in Carbon.

Mr. Stanley Torrance and friends were out to see his new farm on Sunday.

Dr. G.L. McFarlane is leaving soon to take a surgeon's course at the large college in the East.

ORGANIZE SOFTBALL CLUB IN CARBON ON MONDAY

A meeting to organize a softball club was held in the Carbon Barber Shop on Monday night and a number of enthusiasts were present. The following officers were elected:

Frank Emery, treasurer; Wilfred Skerry, secretary; George Ives, coach, R. Skerry.

Practices are to be held every Monday, Wednesday and Friday evening.

Club fees were set at 25¢ a month and the expenses for out of town games are to be paid by the club.

Anyone wishing to try out for the team is asked to attend the practices.

Containers and all packing material

to be used for the delivery of goods, boxes, bottles, sacks, bags, barrels, cans, crates (when returnable), wrapping paper, string, cord, label and all marks of identification of a product, all printed matter giving directions for use information or explanations of use and methods of packing, labels, cartons and packages of crates, boxes, etc., glue for labels.

Debentures, debts, doctor's prescriptions for drugs and medicines, drugs bought on doctor's prescription.

Fares on tramways, automobiles, railroads, steamship, telephone systems by land water or air, feed for poultry or animals, fertilizer, firewood.

Chemicals for treating seed grain, chemicals for the destruction of weeds and pests, barb wire, artificial limbs, Foodstuffs

Footholds, cereals and their products, pines, peats, biscuits, cakes, all bread, etc., meat and its extracted products, meat juice, packed and canned meat, milk and its products, butter, cream, cheese, malted milk, condensed milk, evaporated milk, fish and fish products, camel hair, eggs, their products, canned vegetables, prepared salads, etc., fruits and their products, dried fruits, canned fruits, preserves fruits, fruit juices, nuts, peanut butter, cocoa butter, etc., salt products and their products, sugar products, soap, laundry starch, extracts, chocolate and ice cream, Syrup, maple butter, gelatine, extract, flavor, jelly powder, malt, sauces, soups, Grains, Hay, ice, insurance premiums.

Salaries, wages, etc.

Rain DELAYS SEEDING

Just as many of the farmers had commenced to seed, the fine weather of the week previous changed, resulting in cold damp days, and on Wednesday a light rain continued all day, and the moisture is still holding at press time.

Should the skies clear off within the next twelve hours, it is said that seeding operations could be re-started about the first of next week. As the season is late the farmers are becoming anxious.

### A.G. ANDERSON DIES AT AGE OF 73; FUNERAL AT CARBON ON SATURDAY

Friends and acquaintances of A.G. Anderson, farmer of the Carbon and Ghost Pine districts, were shocked to hear of his death in Calgary last Wednesday morning.

The late Mr. Anderson and Mrs. Anderson, at the home of their daughter, Mrs. R.J. Hutchinson west of Calgary, had made all arrangements to celebrate their 52nd wedding anniversary on Saturday, April 25th. Many friends had invited many of their friends to dinner in the evening. Over excitement is thought to have brought about the illness, which caused his death.

The late Mr. Anderson was born in Sweden, and was 73 years of age. He is survived by his wife, Mary Jane, and two sons, Carl and Alvin, and a daughter, Marie and Clyde of Carbon, and Ralph, of Castavant; also three daughters, Mrs. Pete Neilson, of Victoria, Mrs. U.F. Richardson, of Bergen, Alberta; and Mrs. R.J. Hutchinson, of Carbon, Alberta.

Funeral services for the late Mr. Anderson were held from the United Church, Carbon, on Saturday afternoon at 2 p.m., the Rev. Wm. McNaughton officiating.

During the ceremony Mrs. S. F. Turnbull sang a solo, while Mrs. A.E. McMillan presided at the organ.

Pallbearers were Messrs. S. J. Garrett, H. Irwin, Pete Johnson, S.W. Parkins and A. Costella. Interment was made in the Carbon cemetery.

### BRITISH STORES OF WHEAT ARE SMALL

When a British paper drew attention to its readers to the comparatively small amount of wheat supplies in store in that country it suggested that a substantial amount of the Canadian wheat should be purchased and kept as a reserve.

The Canadian newspapers took the matter up and a general discussion as to the advisability of such a proposal ensued. Many were surprised that the British millers and Britain grain trade should carry such small stocks. But the British have never been charmed of carrying large reserves and this is

## The Century Of Science

Research work now being carried on in the laboratories of the world is devoted to industrial progress and advancement of scientific knowledge is unlocking vast reservoirs of hitherto hidden facts and data to such an extent that their practical application to man's needs and welfare is bound to profoundly change habits and modes of life and work in the future.

Old and well accepted theories in the realms of astrophysics, chemistry, physiology and medicine are often overthrown by the results of work done almost daily in the result of the work which is being carried on by scientist, he-spectated men and women in these research workshops and se rapidly are new discoveries being made and converted to the use of man, so that those who predict that the present century will go down in history as an era of scientific achievement are speaking with anticipated enthusiasm.

In fact, the achievements of the first third of the present century are sufficient in themselves to substantiate the claim for such an assertion even if, for some unknown and unpredictable reason, the work in this field were to be brought to an abrupt halt now.

One does not have to search far to find reasons for this remarkable advance in the sphere of the hitherto unknown and to explain why so much that had remained hidden for centuries is now being revealed in so great abundance.

One of the reasons is the large sums of money which have been made available for the prosecution of such work by wealthy philanthropists. Another is the increased mechanization of industry which it permits to do more and devote a percentage of their earnings to the conduct of scientific work or assist them in unearthing ways and means of improving their products and/or reducing the costs of production to enable them to achieve a paramount place in their field or to achieve it. Another is the now well known fact that science need not discover, or the search for it, opens the door for industry to success in its efforts to go far beyond what the market will bear. Thus, the work is not only progressive but cumulative, and in more than mathematical ratio, something like rolling up a snowball.

Still another reason is the fact that so frequently, a discovery in one field of endeavor results in the perfection of new equipment which makes it possible to determine and solve the mysteries of some other scientific realm or some other school of activity.

And these do not exhaust the reasons. There are others referred to recently by Mrs. O. Lazarus. Writing in a recent issue of the Christian Science Monitor an article dealing with developments in the arena of natural science she said:

"Natural science arises mostly out of man's desire to conquer nature and partly from his inimitable curiosity. From the earliest times man had never been content to lie by alone. It had that within it which impelled it to seek out the mysteries of the world around. It is this curiosity which has enabled man to make instruments which have enabled him to sweep the reaches of the stars and to move along the rocks in order to read from them the history of the earth and those who have dwelt on it in ages past. In his eagerness he has even penetrated into the heart of matter and seen it dissolve into radiation."

The same writer sheds an interesting sidelight on the effect such work has in the minds of those who make new discoveries, when she says: "It is the desire to know which has forced open the locked doors in the Palace of Knowledge. The world has become less certain, less of an at-one-time unshakable faith in the theory that things which his hands could touch and his eyes see."

It is unfortunate that in Canada sufficient recognition is not always given to those who are doing a service to the country in solving the mystery of science for the benefit of the country and her people at all times, but that is too often the case with those who are prosecuting their work under government aegis. As a result, more adequate remuneration sometimes proves too tempting and they are lured away south of the international boundary to greater opportunities.

What benefits which accrue to the country as a result of the development of a fast rust-resistant wheat— to quote an illustration—are weighed in the balance against the remuneration these trained experts receive it is not surprising if better offers from elsewhere for their services are sometimes accepted.

## Talked Through His Hat

New York Man Had Radio-Equipped Silk Topper

An announcee wearing an "old fashioned Easter bonnet," had a radio equipped with a portable radio transmitter and was promoted with the Easter Sunday strollers in New York, describing the fashions and eavesdropping on conversations unknown to them on the sidewalks. The bonnet was provided with a small portable microphone station. The range of the silk-hat broadcaster is about a quarter of a mile.

The human hair grows at an average rate of five inches a year in a temperate climate.

## CONSTIPATION STOPPED AT ONCE!

"Constipation troubles me for months and I tried to eat any good until I tried Fruit-a-tives. They helped my constipation," says Mr. Huddleston, Belleville, Ont. Fruit-a-tives are the discovery of a famous Canadian physician who concentrated extracts of APPLES, ORANGES, LIMES, PRUNES and HONEY. They are scientifically prepared and remain completely fresh for months. Safe—do not contain harsh purgatives or habit-forming drugs. For those who have trouble with constipation. The association will hold its annual meeting at Vancouver, June 22, 23, 24.

Fruit-a-tives workers are boring an oil well on the sea bottom in the vicinity of Baku.

**Fruit-a-tives**

A FAMOUS DOCTOR'S PRESCRIPTION

## Enjoys Life At Goldfields

Well-Worth Trying Says Wife Of Resident Doctor

Completing her first season in one of the north's new mining camps, Mrs. E. N. Dunn, a bride of one year, says there is nothing like joy-riding in a horse-drawn sled.

The young woman, wife of Dr. E. N. Dunn, resident doctor at Goldfield, Sask., accompanied her husband to the Lake Athabasca mining camp.

During a brief stopover at Edmonton after a long airplane flight from the northern mining town, she said: "I enjoy the life very much. It's a very novel, and it's well worth trying."

Goldfields has a pleasant social life, she added. About 30 women and 300 men comprise the camp. Bridal dancing and dog sled races are great favorites and addition she often travels with her husband.

Resorts Show Increase

Returns for the 1938 Canadian resort campaign to raise funds to fight tuberculosis were encouraging and final receipts were expected to show a 10 per cent. increase over 1934, the Canadian Tuberculosis Association said. The association will hold its annual meeting at Vancouver, June 22, 23, 24.

Soviet workers are boring an oil well on the sea bottom in the vicinity of Baku.

## Going In For Ice Cream

London Is Preparing For Big Sale This Summer

Warm weather and unusual fashions are being determined at the Ice Cream and Dairy exhibition at the Crystal Palace, the London News-Chronicle remarks.

"This summer, it seems, we shall consume at least 50,000,000 gallons of ice cream, so that the rehearsal now in progress is thoroughly justified.

"It will be bought from penny-in-the-slot machines, in special paper bags, in tubes of chocolate or in wafle wafer, softness which make it look as if you get more for your penny than you actually do.

"And it will be better ice cream. The British Retail Confectioners have arranged for ice cream manufacturers to buy milk at bulk wholesale prices. Milk powder from abroad has been widely used so far.

"The immense engineering industry, which is now being organized to meet the needs of the big milk distributive combines should give those now engaged in the milk prices inquiry some idea of where the money goes."

## Richly Clad Mummy Found

I Believed To Be Daughter Of Great Pharaoh Cheops

The sumptuously-clad mummy of the princess of the Fourth Dynasty (3720-3560 B.C.) is believed to be the daughter of the great Pharaoh Cheops, who built the second pyramid, has been discovered by Egyptian archaeologists.

The mummy lay in a casket, the lid of which was decorated with gold leaf and semi-precious stones whose location was not revealed in the announcement of the find.

Dressed in bridal raiment, the princess wore a golden diadem, two necklaces of golden beads, anklets and sandals.

A gold-plated copper belt circled her waist and the fingers of her left hand were encased in gold as well, it was said.

Dr. Selim Hassan of Cairo University directed the excavations which resulted in the discovery. He said the tomb apparently had never been pillaged by marauders, like most monuments of ancient Egypt.

## Welsh Discovered America

Landed 300 Miles Before Great Made His Appearance

The legend of the first Indian to step foot on the soil of America was disproved yesterday when a Welsh boy, recently during a Welsh book festival, when books relating to the part played by Wales in world history were ex-

hibited has it that the American continent was discovered by Prince Madoc in the twelfth century, 300 years before Columbus. Madoc set sail from North Wales across the Atlantic with a fleet of 13 ships and returned.

It is declared that he landed near the mouth of the Mississippi and followed his way west. His men made friends with the Indians, and ultimately formed themselves into a tribe of white Indians.

## Broadcast In Eskimo

Bishop Of The Arctic Tells Charges In The North

A bishop's voice rang through the air for thousands of miles on a recent Saturday to carry a greeting in Eskimo to staid-eyed friends who had never heard the sound of a single trumpet or oboe.

Mr. Rev. A. L. Fleming, Bishop of the Arctic, whose Diocese extends across the great expanse of winter's twilit land, spoke English and Eskimo to his people in the north polar tale traffic light were ex-

plained to the Ontario Good Roads convention by J. M. D. Foley, Indian agent from Fort Chipewyan.

He was a bit afraid, facing the high

way, and the images carved on it,

from top to bottom, will include the moose, a bear, a deer, two geese,

## FLEMING'S FOLLY

BY —  
LAWRENCE A. KEATING

SYNOPSIS

The story opens with Link Fleming and his sister, Helen, Helie and Kevin, who have come to town to meet with the object of forming an irrigation company.

The meetings terminate, but Buzz Hamilton and his sister, Helen, Helie and Kevin, who have come to town to meet with Link Fleming about his irrigation plan. This anger, but Buster Link's farm is shot in the middle, and Helie is in trouble. He is arrested and sentenced to three years' imprisonment.

Helen and Fleming form a partnership to provide irrigation for their own farm.

Fleming goes home and studies the plans drawn by Torney to learn what would be the best and more smaller scheme suitable for him and Helen's land, and is satisfied it could be done. But when he returns home fire and there is an explosion that wrecks the house, burns it and the plans are destroyed. He is rescued from the blaze by an employee.

He and Link ride to Rawhide for supplies and to obtain funds to carry the dam project. They meet with Mr. Hayes, who sells Helen and offers to shop with her. Link goes to see the Sheriff, who tells him and Helie that they must be paroled, but that he thinks Link has made a mistake in letting himself released.

Buzz Hamilton arrives back in Rawhide and informs Link that he is in the bank getting a loan for payment of wages for work on the dam. He is told that he must meet him and he goes into the saloon with them. By the time his sister and he come to the bar, Buzz has had several drinks. Buzz has distorted the facts concerning the shooting of Helie, and it appears that Link was trying to ruin him. Buzz, inflamed with liquor and anger, pulls out a pistol and that is thrown to the floor. Then Helen appears and tells Fleming she has been paid off, and that they had obtained the money.

(Now Go On With The Story)

## CHAPTER XI—Continued

"Link," she added on sudden impulse, "you think this dam is going to bring us?"

Something in her worried tone made Fleming eager to go to any extreme to safeguard Helen and her property. "We'll come through," he said with confidence he did not quite feel. "We still have our strength to sell, and once we get cash for em—

we'll be fixed a lot better. I'll get Marty Bush to make our beef go out first when shipping open day after tomorrow. And pay us cash. So, Helen, you better cut out what you're spending and get things all lined up."

He turned a little away. "I'm sorry about Buzz. I planned to give you the surprise of your life, getting him paroled, but I was so anxious, not quite like I expected. Buzz came on stage while we were with Otto Pieper, and knowing he headed right for the Full Moon, I sent you home. By the time I got home, Helie was worried with fire talk again. Instead of being on our side he's plum sure the dam won't turn out."

"Beats me," he exclaimed, scowling. "Few folks can think that Gosh, Helie, you're a good girl, but you can't admit it!"

"Of course it will work, Link." She listened a moment. "I hear Buzz, I think. Please let me know what good you've got in mind."

She was about to trip inside the ranch house when he stayed her. Kevin and Orissa sat waiting on their houses two feet distant but did not move. Then Helie was pulled away. "Helen," Fleming said hesitantly, "being as we're partners, maybe I shouldn't say this but business aside, I sort of—I hope you like me pretty well, do you?"

"Then—then would you?" He kicked self-consciously at a tuft of bunchgrass. "For an instant he hesitated as if debating further speech; but then he thought Link was a mistake in letting himself released.

Buzz Hamilton arrives back in Rawhide and informs Link that he is in the bank getting a loan for payment of wages for work on the dam. He is told that he must meet him and he goes into the saloon with them. By the time his sister and he come to the bar, Buzz has had several drinks. Buzz has distorted the facts concerning the shooting of Helie, and it appears that Link was trying to ruin him. Buzz, inflamed with liquor and anger, pulls out a pistol and that is thrown to the floor. Then Helen appears and tells Fleming she has been paid off, and that they had obtained the money.

(Now Go On With The Story)

He swung from his mount and was approached by a muscular individual in overalls. "I'm Tom, son. You all cheery face, mud and straw with freckles, now wore a serious look. "They're hollering for you," he told Link in a low tone. "I tried to hold them off, but all but about ten men were on strike an' said they were squattin' till we had mud over their dough."

"All right, boy," he called to Kevin and Orissa. "We'll talk wages pronto with your pals. Let's get the Star Loop."

His pulse spedded in triumph. Without turning from the spot, he addressed Chunky Hokanson. "Are you ready to work?" he asked.

"The other eye was wavyed."

But Gyp Vaille with Ferguson at his heels, had come to the scene.

"What you want to do?" Fleming could speak to the nearest man.

"I'll wait," he said.

"I'll wait," he said.</p

**Economical Housewives**

There was a day when the housewives bought the faraway "bargain" in the belief that it was good business to save a few pennies. But experience taught them a few things. Today's housewives do not buy blindly. They examine the article first and when satisfied with the product they pay a fair price at home. It is economical to make your purchases in CARBON
